At the Court at *St. James's*, the 26th of *October*,  
1836.

PRESENT,

The KING's Most Excellent Majesty, in  
Council.

WHEREAS there was this day read at the Board, the humble Memorial of Sir HENRY HALFORD, Baronet, Physician to His Majesty, and President of the College or Commonalty of the Faculty of Physic in *London*, setting forth, that the said President and College have with great care, pains and industry, revised, corrected and reformed a Book by them formerly published, intituled, *Pharmacopœia Collegii Regalis Medicorum Londinensis*, prescribing and directing the manner of preparing all sorts of Medicines therein contained, together with the true weights and measures by which they ought to be made; which book is now perfected and ready to be published, and it is conceived will contribute to the public good of His Majesty's Subjects, by preventing all deceits, differences and uncertainties in making or compounding of Medicines, if, for the

future, the manner and form prescribed therein should be practised by Apothecaries and others, in their compositions of Medicines ; the Memorialist therefore most humbly prays that His Majesty will be most graciously pleased to enforce the Observance thereof in such manner as to His Majesty shall seem meet ; His Majesty this day took the same Memorial into His Royal Consideration, and being desirous to provide, in all Cases, for the Common Good of His People, and being persuaded that the establishing the general use of the said Book may tend to the prevention of such Deceits in the making and compounding Medicines wherein the Lives and Health of His Majesty's Subjects are so highly concerned, hath therefore thought fit, by and with the advice of His Privy Council, hereby to notify to all Apothecaries and others concerned, to the intent they may not pretend Ignorance thereof, that the said Book called *Pharmacopœia Collegii Regalis Medicorum Londinensis*, is perfected and ready to be published ; And His Majesty doth therefore strictly require, charge, and Command all and singular Apothecaries and others, whose Business it is to compound Medicines or Distil Oils or Waters, or make other Extracts within any part of His Majesty's Kingdom of *Great Britain* called *England*, Dominion of *Wales* or Town of *Berwick-upon-Tweed*, that they and every of them immediately after the said *Pharmacopœia Collegii Regalis Medicorum Londinensis* shall be printed and published, do not compound or make any Medicine or Medicinal Receipt or Pre-

scription or distil any Oil or Waters, or make other Extracts that are or shall be in the said *Pharmacopœia Collegii Regalis Medicorum Londinensis* mentioned or named, in any other manner or form than is or shall be directed, prescribed and set down by the said Book, and according to the Weights and Measures that are or shall be therein limited, except it shall be by the special direction or prescription of some learned Physician in that behalf; And His Majesty doth hereby declare that the Offenders to the contrary shall not only incur His Majesty's just Displeasure, but be proceeded against for such their Contempt and Offences according to the utmost severity of Law.

## PRÆFATIO.

---

CUM artes omnes, quibus medicinæ scientia continetur, amplificatas et pene renovatas nostra ætas viderit, nihil mirum si Pharmacopœia, annis duodecim abhinc edita, manca quodammodo et obsoleta facta sit. Ad hanc itaque recogitandam et retractandam jamdudum se accinxerat Collegium Medicorum; sed opus quo minus absolutum esset, plurima obstabant. Nam non modo res semper ardua est multorum hominum sententias in unum colligere, justequè perpendere; sed nostrum fuit præterea de minimis sæpe laborare, et quid antiquum ejiciendum esset, quid corrigendum, quid novum adsciscendum, diligenter considerare, tum singula quo optime modo fierent judicare, planeque explicare. In his multi fuimus. Attamen paulum progressis nova difficultas orta est; siquidem Pharmacopœiam non, ut ante, Londinensem, verum Britannicam conficere voluimus, quæ scilicet Scotiam, Hiberniamque, cum Anglia simul complecteretur. Hinc gentis utriusque Academiæ in consilium vocare necesse fuit; quod cum ex locis tam longinquis vix, aut ne vix, fieri posset, tandem negotio incepto desistere coacti sumus.

Non est hujus loci monstrare per quos viros, quibusque disciplinis auctum scientiarum imperium sit; quamvis inter illos, qui id maxime promoverunt, fuerint etiam quos Collegium Medicorum sibi vindicet. Cum vero naturæ universæ cognitio passibus tam citatis incesse, indignum fuisset medicinam in hac parte, quæ ad remedia spectat, videri claudicare.

Quid tandem a nobis effectum sit, breviter exponere conveniet. Neque enim medicamentorum seriem describere contenti sumus, nisi omnia fuisset denuo perscrutati, tum res chemicas, quæ momento ac numero in annos plurimum creverunt, severo experimentorum judicio imprimis subjecissemus. Harum nonnullæ si usu parum comprobatae videantur, nihilo minus in eundem librum conclusimus, ut quisquis eas aliquando ministrandas putet, unamquamque quam accurate factam habeat. Ad hæc, ne quid aut operis perfectioni, aut ægrotantium securitati desit, notas breves nunc primum adjecimus, quibus medicamentorum, quam desideramus, sinceritas facile plerumque detegi possit; quantum scilicet utilitati medicorum, nec non studentium medicinæ, etsi non semper chemicorum curiosæ analysi, sufficiat.

Nonnulla, de quibus hic agitur, cum a mercatoribus, nullo negotio, satis pura habeantur, horum præparandorum rationem plerumque silentio præterimus; licet ex his quædam nostro more præcipere maluimus, quam curæ, aut incuriæ, aliorum permittere. Et si crystalli aliunde pulchriores, si colores splendidiore ex abundantiore materia producti sint, hæc nihil faciunt ad levationem corporis afflicti.

Id quoque in Pharmacopœia nostra novum est, quod ordinem literarum usque sequi constituimus. Hoc si cui minus videatur artificiosum, sciat nos medentium commodis, non placitis philosophorum, neque otiosorum delectationi, servire. Tamen ex hoc censu chemica quædam excipienda sunt, quæ cum habeant commune vinculum, et quasi cognatione quadam inter se contineantur, legitime dissociari non poterant.

De nominum mutatione vix opus est hodierno die disputare. Cum enim omnes fateantur eam inconsulte fieri non debere, tamen verendum erat ne erroris inde nascituri vitatio in errorem graviolem ducat; quoniam nobis persuasum est rei cujusque nomen id demum certissimum et stabilissimum fore, quod artis suæ principes imposuerint. Itaque nos horum vestigiis insistere decrevimus, et incommodum, si quod sit, parumper sustinere, aut barbarè loqui discere, potius quam ex voce dubia et male definita in obscuritatis periculum incidere. Quod si nomen unum atque alterum ipsi finxerimus, id fecimus iisdem nixi principiis.

Hæc sunt, quæ in principio notare visum est. Nec tamen ii sumus, qui omnibus nos satisfacturos speremus, aut, quæ cupimus ipsi, omnia explevisse. Erunt fortasse qui nimis copiosum, erunt qui nimis brevem et contractum librum nostrum putent. Nobis profecto in votis fuit, si omnibus placere non detur, quamplurimis saltem benefacere; gaudebimusque si juvenes studiosi, medicamentorumque opifices, doctique, vel indocti, fructum aliquem ex

nostro labore percipiant. Sed ante omnia medicorum supellectili adornandæ, et ægrorum saluti consulimus, ut et illi certius tutiusque cum morbis contendant, et hi in lucem optatam sanitatis ocius restituantur.

## NOTÆ.

NOTAS breves, ad res chemicas præcipuè spectantes, adjicere visum est, quibus quidque, sincerum sit, necne, quantum fieri potest, deprehendatur. Quod cum plerumque in herbis atque animalibus minùs necessarium est, tum ne fiat, plura obstant. Quamquam enim suus cuique character satis liquet ex libris botanicis et zoologicis; tamen extracta ex iisdem, et præparata tenuiora, gustu, colore, odore adeò sæpè mutantur, ut nullo certo signo cognosci et paucis explicari possint.

ÆRUGO in aquâ partim, ac ferè tota aut in ammoniâ aut in acido sulphurico diluto, calore adhibito, liquari potest.

ÆTHER SULPHURICUS. Hujus pondus specificum est .750. Aëre in vapores totus abit. Fluctuat autem venalis inter .733 et .765. Lacmum rubro colore levitèr inficit; cum aquâ parcè coit, et limpidus perstat; scilicet ratione fluidunciae in aquæ octario dimidio.

ALCOHOL. Hujus pondus specificum est .815; coloris expers est; calore in vapores abit; cum aquâ, et cum æthere coit; vinum sapit et olet.

ALUMEN (*crystallinum*) penitùs in aquâ liquatur. Ex hoc liquore demittitur alumina coloris expers, ammoniâ vel potassâ adjectâ; quæ tamen iterùm, potassâ suprâ modum additâ, dissolvitur.

AMMONIÆ LIQUOR. Calore in vapores alkalinos fugaces, teste curcumâ, penitùs abit. Adjecto liquore calcis nihil dejicit, neque ubi acido nitrico saturatus fuerit, quicquid demittit per ammoniæ

sesquicarbonatem, aut per argenti nitratem. Hujus liquoris pondus specificum est 0.960.

AMMONIÆ LIQUOR FORTIOR. Hujus pondus specificum est .882. Liquor hic ad normam liquoris ammoniæ redigi potest, cuique fluidunciæ adjectis fluidunciis tribus aquæ destillatæ. Cætera superiori respondent.

AMMONIÆ ACETATIS LIQUOR. Adjecto acido hydro-sulphurico non coloratur, nec quicquid demittit adjectâ vel argenti nitrate, vel barii chlorido. Liquore consumpto, quod restat ammoniam ejicit, et in igne perit.

AMMONIÆ HYDROCHLORAS (*crystallina*). Translucens, calore sublimis fertur, et in aquâ penitùs liquatur. Lacmum colore rubro leviter afficit. Nihil ex barii chlorido demittit. Adjectâ potassâ aut calce, ammonia ejicitur.

## VEGETABILIA.

Decerpenda sunt Vegetabilia, tempestate siccâ, nec imbribus, nec rore madefacta; quotannis colligenda sunt, et quæ diutiùs servata fuerint rejicienda.

RADICES pleræque effodiendæ sunt antequam caules aut folia exserant.

CORTICES colligi debent eâ tempestate, quâ facillimè a ligno separari possint.

FOLIA decerpenda sunt postquam flores expansi fuerint: et antequam semina maturuerint.

FLORES legendi sunt nuper explicati.

SEMINA colligenda sunt jam matura, in propriis pericarpis servanda.

## VEGETABILIIUM PRÆPARATIO.

Vegetabilia, brevi postquam decerpta fuerint, illis exceptis quæ recentia esse oportet, leviter strata, quam citissimè leni calore exsicca; dein in vasis idoneis, intercluso luminis et humoris accessu, conserva.

Radices, quas recentes servari præcepimus, in arenâ siccâ reconde. Colchici Cormum et Scillæ Bulbum ante exsiccationem, tunicis aridis direptis, transversim in laminas tenues seca.

Fructus pulposos, si immaturi sint, vel maturi et sicci, sepone in loco humido, ut mollescant; dein

pulpas per cribrum setaceum exprime ; postea coque lento igne, crebrò movens ; denique aquam balneo aquoso consume, donec pulpæ fiant idoneæ crassitudinis.

Cassiæ Leguminibus contusis Aquam ferventem superinfunde, ut pulpa eluatur, quam per cribrum rarum grandioribus foraminibus primùm exprime, postea per setaceum ; deinde aquam balneo aquoso consume, donec pulpa idoneam crassitudinem habeat.

Fructuum maturorum et recentium pulpam vel succum per cribrum exprime, nullâ coctione adhibitâ.

#### GUMMI-RESINÆ.

Opium a rebus alienis, præsertim externis, quam diligentissimè separa. Servetur Opium molle, quod ad pilulas fingendas aptum sit, et durum, quod balneo aquoso ita exsiccatum fuerit, ut in pulverem teri possit.

Gummi-Resinæ pro optimis habendæ sunt, quæ veniunt adeo sinceræ, ut nullâ purificatione opus sit. Quæ vero minùs puræ esse videantur, in Aquâ coquendæ sunt, donec mollescant, et prelo exprimendæ per pannum cannabinum ; dein seponendæ ut pars resinosa subsidat. Liquorem supernatantem effusum balneo aquoso consume, adjectâ sub finem parte resinosâ, quæ cum parte gummosâ in unum cœeat.

Ut purificentur Gummi-Resinæ facilè liquescentes, vesicâ bubulâ inclusæ in Aquâ fervente teneantur

donec adeò molles fiant, ut per pannum cannabinum à sordibus prelo separari possint.

Styracem in Spiritu rectificato liqua, et cola; tum leni calore destillet Spiritus, donec idonea crassitudo fiat.

PUBLISHED BY

**JAMES DUNCAN,**

37 PATERNOSTER ROW.

THE LIFE of JOHN JEBB, D.D., F.R.S., late Bishop of Limerick, Ardfert, and Aghadoe. With a Selection from his Letters. By the Rev. CHARLES FORSTER, B.D., formerly Domestic Chaplain to Bishop Jebb, Perpetual Curate of Ash-next-Sandwich, and one of the Six Preachers in the Cathedral of Christ, Canterbury. Two Vols. 8vo, 26s. cloth with Portraits.

NARRATIVE of a RESIDENCE in KOORDISTAN, and on the SITE of ANCIENT NINEVEH, with Journal of a Voyage down the Tigris to Bagdad, and an Account of a Visit to Sheraz and Persepolis, with Maps and a Plan of Nineveh from original Observations, and numerous Illustrations. By the late CLAUDIUS JAMES RICH, Esq., the Honourable East India Company's Resident at Bagdad, author of "An Account of Ancient Babylon." In Two Vols. 8vo, 30s. cloth.

\* \* \* This Work, long expected by all who knew the merits and acquirements of the lamented Author (and who, of the many connected with the literature and politics of Asia, did not know the name and lament the loss of that accomplished man?), is now published from his original MSS.

Koordistan is the portion of Western Asia which is, perhaps, the least known. Few Europeans have passed through, and none, it is believed, have printed any description of it. The embassy of Malcolm visited, but left it without enabling England and Europe to judge of their researches. Among the many countries into which Mr. Rich penetrated, Koordistan is that in which he took the greatest interest; and his narrative, though long delayed, contains the full and fresh impressions of his mind.

THE DOCTRINE of ATONEMENT and SACRIFICE, evinced from the Scriptures, and confirmed from the Sacraments: Errors Considered, and Difficulties of Theists and Infidels Removed. By JOHN WHITLEY, D.D., Author of "The Scheme, &c. of Prophecy," "The Blood of Jesus Christ Cleanseth from all Sin." In One Vol. 8vo, 10s. 6d. bds.

THIRTY YEARS' CORRESPONDENCE between JOHN JEBB, D.D., F.R.S., Bishop of Limerick, Ardfert, and Aghadoe, and ALEXANDER KNOX, Esq. M.R.I.A. Edited by the Rev. CHARLES FORSTER, B.D., Perpetual Curate of Ash-next-Sandwich, and one of the Six Preachers in the Cathedral of Christ, Canterbury, formerly Domestic Chaplain to Bishop Jebb. Two Vols. 8vo. Second Edition, with Translations of the Greek and Latin Passages, and an Index. 28s. boards.

REMAINS of the late ALEXANDER KNOX, Esq. of Dublin, M.R.I.A., containing Letters and Essays on the Doctrines and Philosophy of Christianity, and the distinctive Character of the Church of England; with Portrait, from a Bust by Chantrey. Second Edition. Two Vols. 8vo, 24s. boards.

**THE HOLY BIBLE**; containing the OLD and NEW TESTAMENTS, revised from Corrected Texts of the Original Tongues, and with former Translations diligently compared: with Critical and Explanatory Notes. By B. BOOTHROYD, D.D., Editor of the "Biblia Hebraica," &c. &c. Forming a volume, in imperial octavo, of 1280 pages. Price 30s. cloth.

The work announced comprises the Text of the Author's Family Bible and Improved Version, with such Corrections as a repeated and diligent perusal during the last ten years has suggested, aided by the many Biblical works which have been published since his own was completed. The results of the labours of the most eminent scholars and Biblical critics of past and present times, will here be found in a condensed form; by which infidel objections are in many instances satisfactorily obviated, and the judicious English reader will be enabled to perceive the sense, coherence, and beauty of the Holy Scriptures.

**ESSAYS, THOUGHTS, and REFLECTIONS, and SERMONS on VARIOUS SUBJECTS.** By the Rev. HENRY WOODWARD, A.M., formerly of Corpus Christi College, Oxford, Rector of Fethard, in the Diocese of Cashel. One Vol. 8vo. Third Edition. 12s. boards.

"There are some striking views on the *Divine Omnipotence* in a recent volume of Essays and Sermons, by the Rev. Henry Woodward of Ireland; a work replete with originality, and rich in the germs of high thought. From Dr. Chalmers's Works, now publishing. Vol. 2.—*Natural Theology*, Vol 2, page 285.

**THE WHOLE WORKS** of the Most Reverend Father in God, ROBERT LEIGHTON, D.D., Archbishop of Glasgow. To which is prefixed an entire new Life of the Author, by the Rev. J. N. PEARSON, M.A., of Trinity College, Cambridge, and Chaplain to the Most Noble the Marquess Wellesley. Four Vols. 8vo, with a Portrait, 36s. boards.

"We have placed a new edition of Archbishop Leighton's Works at the head of this article; and as Mr. Coleridge has neglected to furnish the biographical notice he had promised, we shall endeavour to supply its place by a few particulars of his life and writings, principally extracted from a spirited and eloquent Memoir prefixed to the new edition, by the Rev. Norman Pearson. It is a reproach to the present age, that his valuable writings, breathing as they do the sublimest and purest spirit of piety, rich in beautiful images and classical learning, throughout abounding in practical reflections, and all expressed with the sweetest and simplest eloquence, should have been neglected among us."—*British Critic*.

A SECOND COURSE of SERMONS for the YEAR ; containing Two for each Sunday, and one for each Holyday ; abridged from the most eminent Divines of the Established Church, and adapted to the Service of the Day : intended for the Use of Families and Schools. Dedicated, by permission, to the Lord Bishop of London. By the Rev. J. R. PITMAN, A.M., alternate Morning Preacher of Belgrave and Berkeley Chapels. In Two Vols. 8vo, 21s. boards.

" There is no question which the Clergy are more frequently asked, and to which they find it more difficult to give a satisfactory reply than this—What Sermons would they recommend for the use of a private family? There are so many circumstances which render the greater part of modern discourses totally unfit for the purposes of domestic instruction, and the old standards, unmodernised, are so little intelligible to common ears, that it is no easy matter to point out any set of discourses embracing a sufficient variety to excite attention, at the same time forcibly inculcating the pure doctrines and practical precepts of Christianity. We really think that Mr. Pitman's work bids fair to supply the deficiency which has been so much regretted."—*Quarterly Theolog. Review*.

\* \* \* A Third Edition, *revised throughout*, of the FIRST COURSE, is just published, same size and price as above.

This beautiful Edition has received the highest encomiums from the late Professor Dobree, and many other eminent British and Continental Scholars, and is the only Variorum one hitherto published: it contains the whole of the Greek Text, revised and amended from manuscripts now first collated or used in any edition of Plato; the Latin Translation of Ficinus; the Greek Scholia; the Annotations, either entire or select, of the different Commentators on the Text of Plato, or the Works attributed to him; a Reprint of the Lexicon Platonicum of Timæus, as edited by Ruhnken; the whole preceded by Fischer's Literary Notice of the Life and Writings of Plato. Bekker's Text and Scholia are used, and such typographical errors are corrected as had escaped the Editor's vigilance.

The spirited Projector of this fine Classic intended to publish it at 10l. 10s. for the small, and 18l. 18s. for the large paper; but it is now offered at the above-mentioned reduced prices.
